FAAC IN GROUND OPERATOR

Low voltage Swing Operator.
Control box below ground for "invisible" installation.

- Invisible, in-ground installation will not detract from gate appearance
- Includes custom brackets for attaching to steel frame on Sederra driveway gate
- Two remote control transmitters, control panel with 14x16in fiberglass enclosure, two batteries
- Maximum weight per gate leaf: 800 pounds
- Use for double swing gates 10ft to 20ft wide (total gate width)
- Exit wand & Photo Beams
- Can be setup for either In Swing or Out Swing, up to 110 degrees
- 13 second opening time

GTO 4000/4200XL ARMED OPERATOR

Professional Residential Swing Operator.
Control Boxes above ground for flexible installation and attachment.

- AC transformer (2) 12V batteries
- Operator Arms
- 6' power cable
- Exit wand & Photo Beams
- Double swing gates 11'-12' wide: Gate and arm must be mounted on same steel post
- Double gates over 12' wide: Gate and arm can be mounted on steel post or masonry column / wall
- Cannot be used on double gates less than 11' wide (~5.5' per leaf)
- Opens gate inward
- Outswinging gate requires two additional brackets (sold separately) to swing outward
